Lynn White
Member Emeritus

The GMR Foundation for Research and Education Foundation exists to educate the next generation of EMS providers by offering crucial funding for research and education, such as research grants and educational scholarships for emergency medical professionals and students

On September 17, 2026, we are hosting the Annual Charity Golf Tournament to benefit the Foundation at the Bear Creek Golf Club in Dallas, TX. Our goal is to raise \$515,000.00 for the year, which will be used to further the mission to support research and education in EMS.

Our event is expected to draw over 50 major sponsors and donors and 150 golfers, including CHUBB, Blue Cross Blue Shield of Texas, Laerdal Medical, Hastings Group, Empower, Image Authority and many more. Our supporters are featured prominently in our event day signage and program, as well as on our website.

Will you help us out with a donation of a product or service from your business for our silent auction? It will help a student realize their dream of becoming an EMT or Paramedic, a new doctor to receive the training they need to be an EMS Medical Director, or an organization to receive much needed training equipment.

The GMR Foundation for Research and Education is classified as a Public Charity, per IRC section 501(c)(3), non-profit organization, TIN 45-5464550. Please check with your tax professional to determine your specific ability for tax deductible eligibility.

On behalf of the entire board for the GMR Foundation for Research and Education, I want to thank you for your valuable time and consideration. To donate, please reach out to amy.mckenney@gmr.net

Amy McKenney

Executive Director

GMR Foundation for Research and Education

Our mission is to support clinical, education and health systems research designed to improve the care and safety of patients in the out of hospital setting. The Foundation supports research and educational activities within clinical practices, and promotes initiatives focused on improving patient care and projects which contribute directly or indirectly to the health and wellbeing of communities.
